PROFESSIONAL SUMMARY

Commercially minded **Merchandising leader (15 years)** now pivoting into **data analytics and business intelligence** with a strong data-driven mindset. I am currently completing the **Code Institute Full Stack Web Development Diploma (SCQF Level 8)** – equivalent in level to a foundation degree – with a **final specialism in Predictive Analytics and building a Data App**.

Technical training covers:

Front-end: HTML5, CSS3, JavaScript (ES6), Bootstrap, responsive design

Back-end: Python, Flask, Django, REST APIs

Databases: MySQL, SQLite, PostgreSQL, SQLAlchemy, data modelling

Development practices: Git/GitHub version control, Agile workflows, testing (unittest/Jest), deployment (Heroku, Render), CI/CD pipelines, and professional documentation (README, flowcharts, storyboards).

Throughout my career I have consistently favoured **data-led decision making**. In my most recent role, I managed **£65m in sales across 258 stores and 10 international markets**, leading a team of 14 and delivering KPIs aligned to strategic objectives. I **introduced Power BI dashboards** and **supported major system rollouts** (Microsoft Dynamics), enabling improved forecasting, planning, and stakeholder engagement.

I bring a proven ability to **translate complex data into clear insights, design BI dashboards** that drive action, and **collaborate with senior stakeholders** to deliver commercial impact. Upon completing my diploma, I plan to pursue the **Microsoft PL-300 (Power BI Data Analyst) certification** to round off my training and further enhance my **BI developer** capabilities. Now seeking an entry-level opportunity – **Junior BI Developer, Data Analyst, or Tech/Product Operations** – where I can combine my **technical foundation, commercial acumen, and leadership experience** to add immediate value and continue growing within the data and analytics field.

SKILLS

Data & Analytics: Power BI (dashboards), advanced Excel, SQL (SQLite/Postgres basics), Python (Pandas/NumPy), KPIs & experiment mindset, requirements gathering, data storytelling.

Software & Web: Python, Flask, (learning) Django, JavaScript, Node basics, Jest testing, HTML/CSS/Bootstrap, JSON, Git/GitHub, REST APIs, Leaflet/OS Maps.

Platforms & Tools: Power BI, Jupyter, scikit-learn (foundations), matplotlib, VS Code, GitHub Projects/Issues, Microsoft Dynamics rollout support.

People & Leadership: Team management (department of 14, up to 5 direct reports), coaching & performance, cross-functional collaboration, influencing senior stakeholders, vendor & partner management.

Commercial & Ops: Range planning, forecasting & OTB, pricing & promotions, P&L understanding, process improvement, change management.

Ways of Working: Agile-friendly habits, roadmap thinking, backlog grooming, documentation, stakeholder workshops, training & adoption.

EXPERIENCE

Export Retail Merchandise Manager, Regatta Ltd, Feb 2023 - current

- **Delivered high-impact seasonal insight packs** that transformed complex analytics into clear, actionable presentations – influencing senior decision-makers, aligning cross-functional teams, and driving targeted responses to emerging trading opportunities.

- **Enhanced business performance visibility** by applying adaptable analytical frameworks to new markets, channels, and product categories, and developing/rolling out Power BI tools – including retail data analysis apps and trading/sell-through/stock dashboards – improving commercial decision-making speed and accuracy.
- **Owned Export Retail pricing governance end-to-end**—aligned to the corporate framework, designed market-specific price ladders & guardrails, automated Power BI/Excel dashboards (competitor index, promo uplift, elasticity proxies), and partnered with Finance/Marketing to run test-and-learn cycles that optimised margin mix while maintaining competitiveness.
- **Directed profitable stock management** across multiple retail markets, optimising availability, minimising overstock risk, and supporting growth plans through accurate forecasting, category analysis, and best-practice OTB management.
- **Owned and delivered the Retail Merchandising Critical Path**, ensuring timely range selection, product volume forecasting, and alignment with budget and sales plans across brands and territories.
- **Strengthened strategic alignment** by collaborating with stakeholders, market teams, and directors in seasonal planning, producing go-to-market packs, and ensuring retail priorities were embedded in group strategy.
- **Built and led a high-performing merchandising team** of 14 (including 5 direct reports), instilling a results-driven culture through coaching, structured performance management, and team development planning.
- **Improved operational efficiency** by leading monthly Virtual Warehouse reviews to drive in-season agility, creating seasonal European price lists in multiple currencies, and introducing new systems – including a Merch Financial Planning platform and the migration from AS400 to Microsoft Dynamics WMS.
- **Partnered with supply chain teams** to identify and resolve issues, enhance warehouse operations, and implement process improvements that reduced delays and improved on-time delivery performance.
- **Acted as a trusted brand partner** to Buying, Product, and Digital teams – making data-driven recommendations that shaped range development, boosted category profitability, and supported regional market needs.
- **Championed continuous improvement**, embedding best-practice merchandising processes, refining analytics/reporting outputs, and mentoring team members to build future leaders within the department.

Senior Merchandiser, Regatta Ltd, Feb 2016 - Jan 2023, Manchester

Merchandiser Dare2b Brand/ UK Concessions, Regatta Ltd, Jan 2014 - Jan 2016, Manchester

Assistant Merchandiser/ Regatta Group, Regatta Ltd, April 2011 - Jan 2014, Manchester

Stock Controller/In Store Merchandiser, The White Company, Jan 2010 - Jan 2011, Manchester

Stock Controller In Store , Next, Nov 2006 - Jan 2010, Manchester

EDUCATION

Full Stack Web Development , Web Development Jan 2026

Code Institute

Currently studying to become a certified Full Stack Web developer. ETA for Completion Jan 26. Completed and passed 3 of 5 projects.

New Manager Bootcamp, Management Training Feb 2023

The Hub Events

The new manager Bootcamp is a one day , practical training course designed to equip first time managers. It focuses on building essential management skills , confidence, and tools to lead effectively, handle common challenges, and make a successful transition into leadership roles

JTME Certificate, JTME Course Nov 2017

Instep - Manchester

Completed JTME (Journey to Management Excellence Course) offered by the company

Personal Effectiveness Certificate, Personal Effectiveness Course Nov 2014

Instep - Manchester

Completed Personal Effectiveness Course offered by Company in 2014

WEAF level 2 Computerised Accounting, Basic Accounts part 1 &2, Finance Aug 2011

Kaplan Financial - Manchester

Kaplan Financial

March 2011 - Sept 2011

Studied Accounting WEAF module

Studied for one year - Was unable to complete due to financial reasons, Hospitality & Management
Manchester Metropolitan - Manchester

May 2008

GCSEs

June 2001

Our Lady's RC High School - Manchester

Religious Education - (A)

English Literature - (B)

English Language - (B)

Maths - (B)

Art - (B)

Information Technology - (C)

Double Award Science - (C,C)

French - (D)

COMMUNITY SERVICE

General Election Vote Counter -

Manchester City Council May 2015

LANGUAGE

English, Native

ACHIEVEMENTS

- Managed £65m revenue portfolio across 10 international markets with complex trading nuances.
- Built and rolled out BI dashboards that improved reporting cadence and reduced manual analysis time.
- Led cross-functional change initiatives (Dynamics & planning system), driving adoption and training.

TRANSFERABLE SKILLS

- **Stakeholder management:** Trusted partner to senior leadership; translate business goals into tech/data tasks.
- **Communication & storytelling:** Turn complex analysis into simple narratives and visuals; tailor to audience.
- **Delivery mindset:** Plan → execute → review; comfortable with ambiguity; iterate fast with feedback.
- **Customer-first & data-led:** Balance qualitative insight with quantitative evidence to recommend action.

PROJECTS

Elden Souls – Flask Web RPG (*Python, Flask, NumPy, HTML/CSS/JS*)

A web-based text adventure inspired by Dark Souls, featuring branching narrative and combat mechanics.

- Designed modular **JSON-driven story loader**, class system, and session-based save/load.
- Implemented **battle logic** with NumPy, including dodge, block, items, and special attacks.
- Built a gothic-themed UI with **dynamic health bars, sound effects, and unit-tested code**.

Anagram Jam – Word Puzzle Game (*JavaScript, HTML, CSS, Bootstrap*)

An interactive browser-based anagram puzzle with multiple difficulty levels.

- Programmed **game logic** for word shuffling, scoring, and guess validation.
- Created **Scrabble-style animated tiles** with flip effects and staggered reveals.
- Delivered a **responsive, accessible UI** with feedback messages and keyboard support.

Crypt of Shadows – Dungeon Crawler CLI (*Python, Heroku, JSON*)

A Souls-inspired, turn-based dungeon crawler running in the terminal.

- Implemented **object-oriented design** with themed player classes, randomised enemies, and final boss.
- Built features including **combat, Estus Flask healing, traps, rest rooms, and relics.**
- Added **save/load system with JSON I/O, defensive validation, unit tests, and Heroku deployment.**

Retail Pricing & Forecasting – Python Data Project (*Python, Pandas, Matplotlib, RandomForest*)

Time-series forecasting and exploratory analysis of retail sales performance.

- Compared **seasonal-naïve baselines vs. RandomForestRegressor** for monthly forecasts.
- Produced **CSV outputs and Matplotlib charts** by Region & Category.
- Focused on **reproducibility, clean commit history, and well-documented workflow.**

Retail Pricing & Sales Insights – SQL Portfolio Project (*SQL, Python, Pandas, SQLAlchemy, Matplotlib*)

Database-driven retail analytics project for pricing, stock, and customer insights.

- Designed **schema and ERD** simulating retail transactions and inventory data.
- Wrote advanced **SQL queries** (CTEs, joins, window functions, segmentation, outlier detection).
- Integrated with Python to generate **BI-style dashboards and stakeholder reports.**

Retail Analytics Portfolio – BI Dashboards (In Progress) (*Python, Pandas, Matplotlib, Jupyter*)

A developing portfolio project preparing BI dashboards to visualise mock retail data.

- Generated **synthetic datasets** to simulate sales, pricing, and category performance.
- Preparing to build **interactive dashboards** highlighting KPIs and visual trends.
- Focus on **data cleaning, reproducibility, and clear presentation for stakeholders.**
